

Web Developer Internship

The Puget Sound Educational Services District's Online Development Center is looking for an intern to join our web development/design team. This is a great opportunity for a college student or recent grad looking to gain relevant work experience and build on their web design skills.

Duties:

- Add/modify content on client websites
- Build new pages based on pre-defined templates
- Create and update style sheets
- Support lead developer in creation of original web applications and modifications to existing applications

Minimum Qualifications:

- Solid understanding of programming principles
- Experience programming in PHP, ColdFusion or Ruby on Rails
- Basic understanding of CSS (text and layout)
- Basic understanding of javascript programming
- Good writing/proofreading skills

Desired Qualifications:

- Experience with Dreamweaver
- Comfortable on both Mac and Windows operating systems

Compensation: \$10/hour

Since this is an internship position, we don't expect you to have an extensive portfolio and years of experience. It would be nice, however, if you provide us links to sites you've worked on with information about how you contributed to each site.

The days and hours you work are flexible (12-20 hours per week). The length of the internship is also flexible but we ask that you commit to at least 3 months.

If interested, please send resume, cover letter, and links to rkang@highline.edu
