Sciences Ten (10) credits from life and physical sciences. Must include one (1) lab science. Limit of 10 credits from one department.	20	15			
Lab Science (5 credits)					
Life/Physical Science (5 credits)					
CSCI/Math 152 (5 credits)					
Emphasis Area (Method II only) All credits from one department		15			
CS& 132					
CS& 141					
CSCI 143					
TOTAL CREDITS REQUIRED	90				

Associate of Arts Guidelines

- The Associate of Arts is a Direct Transfer Agreement that allows you to transfer as a junior and, with careful planning, complete most, if not all, of your pre-requisites required for your major.
- No more than 15 credits of "restricted classes" can count toward your degree. Generally, Professional and Technical programs classes are considered to be restricted area classes. Cooperative Education or Internships, CLEP credits, credit for work or life experience, Study Skills, and Career Exploration are also restricted area classes. Non physical education activities class are restricted.*
- Maximum of three (3) physical education activity credits can apply toward the degree.
- The Associate of Arts degree requirements change from year to year. You can elect to complete the requirements from when you begin or finish your degree.
- The AA degree-Method I can be a useful option for students who are uncertain about their major and would like to do more exploring of career options and interests. Method II (with Emphasis) allows a student to use 15 credits from one department and may be beneficial to prepare for some majors. Check with an academic advisor or your faculty advisor to determine if Method I or II is best for you.
- A cumulative GPA of a 2.0 or higher is required to graduate with an Associate of Arts degree.
- To receive credit for a class toward this degree, a student must earn a D (1.0) in the course.

Classes that meet the degree requirements (*Confirm with online Degree Audit*):
