ABOUT WEB DEVELOPMENT

Highline's Web Development program teaches students to design and create dynamic, data-driven websites for small to mid-size businesses.

Highline works closely with industry professionals to ensure that students are learning the most relevant and marketable skills. Highline also ensures that graduates are well prepared to help meet the huge demand for web developers in the Puget Sound region.

Students in the Web Development program learn through internships and real-world projects.

“The Web Development program at Highline College has helped prepare me for an opportunity to either freelance or work as an entry-level web developer.”
— SHAWN SEELEY, WEB DEVELOPER
