2400 S. 240th Street • Des Moines, WA 98198

The college provides equal opportunity in education and employment and does not discriminate on the basis of race, color, national origin, age, disability, sex, sexual orientation, marital status, creed, religion, or status as a veteran of war. Prohibited sex discrimination includes sexual harassment (unwelcome sexual conduct of various types).
COMPUTER SCIENCE will help you find rewarding jobs in the Software development and Information Technology (IT) field. Computer science is the study of computation and information processing. It involves the design, development, analysis, and application of computer software and hardware as well as the theoretical foundations of computing. Computer science includes a wide range of topics, such as programming languages, algorithms, data structures, databases, artificial intelligence, computer networks, cybersecurity, and human-computer interaction.

Highline offers two-year courses that prepare you to transfer to computer science or related bachelor’s degree programs at four-year schools. If you want to stay local, Highline College has a BAS in Cybersecurity. Highline College has also collaborated with Central Washington University - Des Moines on their Bachelor of Science in Computer Science degree. This is a unique 2+2 program where you can take your first two years at Highline College and easily transfer to CWU - Des Moines to complete your second two years.

COMPUTER SCIENCE TRANSFER

Highline graduates have many options for transferring to a four-year college or university: public and private, in-state and out-of-state. There are many bachelor’s degree programs not only in Computer Science, but also in Information Technology, Informatics, and Computer Engineering. The degree you pursue at Highline depends on where you want to transfer to, and which degree you wish to pursue there. For most in-state four-year Computer Science programs, the AA degree is the best option. For the UW (Seattle campus) and some private schools, the AS degree may be the preferred degree choice. The first step in the transfer process is to explore your options and decide on the right choice for you. It’s always a good idea to plan on applying to more than one college or university.

FOUR-YEAR CSCI PROGRAMS IN WASHINGTON

- Central Washington University
- University of Washington
- UW – Bothell
- UW – Tacoma
- Eastern Washington University
- Gonzaga University
- Seattle University
- Washington State University
- Western Washington University
